In-State Broadcast Programming)

To: The Commission

REPLY COMMENTS OF THE NATIONAL ASSOCIATION OF BROADCASTERS

I. Introduction And Summary

The National Association of Broadcasters (NAB)¹ hereby provides additional comment and data to help the Federal Communications Commission complete its report on consumers' access to in-state broadcast signals and programming, as required by Congress in Section 304 of the Satellite Television Extension and Localism Act of 2010 (STELA).² As NAB demonstrated in its initial comments, viewers across the country have access to a plethora of in-state and out-of-state television station signals, both over-the-air and via cable and satellite delivery, thus obviating any need to disrupt the existing structure of local television markets.³

¹ NAB is a nonprofit trade association that advocates on behalf of local radio and television stations and also broadcast networks before Congress, the Federal Communications Commission and other federal agencies, and the courts.

² See *Public Notice*, "Media Bureau Seeks Comment for Report Required by the Satellite Television Extension and Localism Act on In-State Broadcast Programming," in MB Docket No. 10-238 (rel. Nov. 23, 2010) ("*Public Notice*").

³ Television markets, known as Designated Market Areas (DMAs), are defined by Nielsen Media Research. NAB's initial comments detailed how DMAs are formulated and their importance in the television marketplace. See Comments of the National

According to a report by BIA/Kelsey attached to NAB's initial comments, 97.8 percent of the total 2000 U.S. Census population receives over-the-air at least one in-state full-power television station.⁴ Attached to these reply comments, we provide additional data from BIA/Kelsey that shows even higher levels of over-the-air access to in-state signals when TV translators, Class A stations and low-power TV stations are included. According to this more comprehensive report accounting for these additional outlets, 99.24 percent of the total U.S. population has access to at least one in-state TV station over-the-air. Additionally, on a weighted average basis, consumers across all counties nationwide receive over-the-air 17.6 in-state TV stations and 4.5 out-of-state stations.⁵ And, of course, cable and satellite systems also provide viewers access to numerous in-state and out-of-state TV stations.⁶

NAB also showed in our initial comments how government-mandated changes to the existing DMA system would negatively impact both local stations and their viewers, and inhibit the efficient functioning of the local advertising market. Commenters agreed

Association of Broadcasters in MB Docket No. 10-238 (Jan. 24, 2011), at 5-14 (NAB Initial Comments).

⁴ Attachment A to NAB Initial Comments, *Analysis of In-State and Out-of-State Reach by Local Television Stations*, Dr. Mark R. Fratrick, BIA/Kelsey (Jan. 24, 2011), at 7 (BIA Initial Study).

⁵ Attachment A, *Further Analysis of In-State and Out-of-State Reach by Local Television Stations*, Dr. Mark R. Fratrick, BIA/Kelsey (Feb. 22, 2011), at 6 (BIA Further Study).

⁶ On a weighted average basis, 12.3 in-state and 3.9 out-of-state TV stations are carried across all cable reporting units. Almost all (99.99 percent) of subscribers to these cable reporting units are estimated to be receiving at least one in-state TV station. In addition, 97.8 percent of Dish Network subscribers, and 93.9 percent of DIRECTV subscribers, can receive at least one in-state TV station. Across all counties on a weighted average basis, Dish Network subscribers receive 9.7 in-state TV stations and 1.5 out-of-state stations; DIRECTV subscribers receive 8.9 in-state and 1.5 out-of-state stations. BIA Initial Study at 11, 15.

that the existing market-driven DMA system functions to ensure that the needs and wants of local viewers and communities are met. Both broadcaster and multichannel video programming distributor (MVPD) parties agreed that alternative television market structures, such as those based on state boundaries identified in the *Notice*, would upset the expectations of television viewers, tend to reduce the total amount of locally produced programming, and, as a practical matter, be impossible to implement for a host of technological and regulatory reasons.

NAB and other commenters further have shown that no changes to existing law or regulation, or to the current DMA system, are necessary for MVPDs to provide consumers with local news and other local programming, including in-state programming, from stations outside their existing markets. In short, the current system effectively operates to provide viewers with very high levels of in-state stations and programming. The self-serving proposals offered here by DISH Network to alter radically the significantly viewed rules to expand satellite transmissions of distant signals thus would unnecessarily harm local stations and their viewers, and are contrary to the intent of Congress.

II. Commenters Have Shown That The Current DMA Structure Best Ensures That Viewers Receive High Levels of In-State Television Service and Locally Responsive Programming

Commenters in this proceeding have shown that the current market-driven DMA structure operates to provide viewers across the country with very high levels of in-state service and locally relevant programming.⁷ In our initial comments, NAB provided extensive data demonstrating the remarkably comprehensive over-the-air coverage of

⁷ See NAB Initial Comments at 16-22; Comments of LIN Television Corp. in MB Docket No. 10-238 (Jan. 24, 2011), at 7-8; Comments of The Local Television Broadcasters in MB Docket No. 10-238 (Jan. 24, 2011), at 4-10.

full-power in-state television signals – serving nearly 98 percent of the total U.S. population with at least one in-state station – under the current DMA system. A further study attached to these reply comments provides additional data showing even greater in-state service when over-the-air coverage of Class A, low power TV, and TV translator stations is included.⁸ This new report shows that over 99 percent of the total U.S. population has over-the-air access to at least one in-state full-power TV station either through the primary transmitter or through a TV translator. Consumers across all counties nationwide receive over the air, on a weighted average basis, 17.6 in-state television stations when all stations – including local low power stations – are considered.⁹ And as shown in the chart below summarizing the BIA/Kelsey data pertaining to over-the-air service, there are 123 DMAs where the weighted average of the number of in-state full-power, translator, Class A and low-power stations received over the air exceeds 10 stations (with 194 markets receiving more than five in-state stations and 207 markets receiving more than three in-state stations).

Summary Analysis of In-State and Out-Of-State Over-the-Air Television Service in the U.S.			
	Full-Power Television Stations Only	Full-Power Television Stations and Translators	Full-Power, Translators, Class A and Low-Power Television Stations
Percentage of U.S. Population Receiving at Least One In-State TV Station Over the Air	97.80%	99.12%	99.24%
Average # of In-State Television Stations Received Over the Air Across All Counties	12.2	13.2	17.6

⁸ See Attachment A, BIA Further Study. TV translator stations provide extended and fill-in coverage of full-power broadcast stations, thereby expanding the reach of full-power service.

⁹ *Id.* at 4, 6.

Average # of Out-Of-State Television Stations Received Over the Air Across All Counties	3.8	3.9	4.5
Average Market Percentage Population Receiving at Least One In-State TV Station Over the Air	96.1%	98.5%	98.6%
Number of Markets where 100% of Population Receives at Least One In-State Television Station Over the Air	72	79	79
Number of Markets Where the Average # of In-State Television Stations Received Over the Air Exceeds 10	67	87	123
Number of Markets Where the Average # of In-State Television Stations Received Over the Air Exceeds Five	152	176	194
Number of Markets Where the Average # of In-State Television Stations Received Over the Air Exceeds Three	187	206	207

Even considering only this data pertaining to over-the-air service, it is clear that the current DMA system is, in fact, providing viewers with access to a plethora of in-state stations and programming, and that modifications to that system are not necessary to ensure such access. Moreover, as set forth in our initial comments and in BIA's Initial Study, and as briefly summarized in note six above, cable and satellite carriage of in-state broadcast stations enhances the very impressive level of over-the-air access to local stations and programming.

Other commenters in this proceeding also provided information supporting NAB's showing that the existing structure of local television markets reflects actual viewer preferences and evolves over time as these viewing patterns change. For example, the Local Television Broadcasters, a group of station owners that collectively operate 160

full-power stations in more than half of the television markets in the country, agreed with NAB that DMAs “accurately reflect social and economic realities, geographic affinities, and current viewing patterns,” and that “DMA definitions are designed to stay current with social and economic behavior and viewing practices.”¹⁰ LIN Television and other commenters specifically pointed out that the current DMA system, and FCC rules that utilize DMAs, have two self-adjusting mechanisms. First, Nielsen routinely updates the boundaries of DMAs to reflect changing viewing patterns.¹¹ Second, Congress has granted the FCC authority to modify markets based on requests from a local television station or cable system if such a modification is consistent with “the value of localism.”¹²

Commenters further offered numerous real-world examples of how the current DMA system functions to provide viewers with locally-responsive programming and services. In particular, the Local Television Broadcasters provided many specific examples of how, in cross-border DMAs, local stations, although they may be physically located in another state, provide significant local coverage – in fact, coverage more relevant and responsive than coverage that more distantly-located stations in the same state likely would provide. For instance, in the Omaha DMA, stations located in Nebraska routinely cover major issues impacting communities in western Iowa that fall within their market. Omaha station WOWT provided 12 hours of non-stop coverage on the Little Sioux Tornado, a tornado that “caused devastating damage to a small area in

¹⁰ Local Television Broadcasters Comments at 1, 3. *Accord* LIN Television Comments at 3-4.

¹¹ LIN Television Comments at 3, citing *Report and Order and Further Notice of Proposed Rulemaking, Definition of Markets for Purposes of the Cable Television Broadcast Signal Carriage Rules*, 11 FCC Rcd 6201 (1996).

¹² LIN Television Comments at 4, citing 47 U.S.C. § 534(h)(1)(C). *See also* NAB Initial Comments at 6-8.

Iowa – the Little Sioux Scout Range – and killed four boy scouts and injured dozens.” WOWT also extensively covered the Iowa gubernatorial race, other issues on the Iowa ballot during the November 2010 election, and the protests by Iowa commuters who work in Omaha about the imposition of a commuter tax.¹³ The Local Television Broadcasters’ comments also demonstrated the economic necessity for local stations to serve their in-market but out-of-state viewers. For example, in the Quincy, IL-Hannibal, MO-Keokuk, IA DMA, station KHQA is licensed to Hannibal, MO but its out-of-state viewers in Illinois and Iowa collectively amount to about 71.43 percent of the total television households in the DMA.¹⁴ Obviously, a station such as KHQA must be responsive to its out-of-state viewers if it wants to attract the largest possible audience and advertising revenue.¹⁵

In sum, evidence and data in the record demonstrate that viewers across the country have access, both over-the-air and via MVPDs, to a plethora of in-state broadcast stations and programming, as well as access to out-of-state (but in-market) stations that provide locally relevant programming.

III. Changes To The DMA Structure Would Severely Disrupt The Television Marketplace And Impair Distribution Of Local Programming

Changes to the existing structure of television markets are not only unnecessary, a number of commenters showed how such changes would have a detrimental effect on all parties involved: broadcasters, MVPDs, advertisers and, most importantly, viewers.

¹³ Local Television Broadcasters Comments at 6.

¹⁴ Local Television Broadcasters Comments at 5.

¹⁵ The Local Television Broadcasters also pointed out that in these cross-border DMAs, the local in-market (but out-of-state) stations are generally geographically closer to out-of-state (but in-market) viewers than stations located in their “home” states. *See id.* at 3 (citing several examples). *Accord* BIA Initial Study at 20, 24.

Cable, satellite and broadcast commenters all noted the disruptive and harmful effects that changes in the DMA system would have on television viewers. The National Cable & Telecommunications Association stated that “market changes that would require operators to delete one group of broadcast stations in favor of another could disrupt long-established cable customer viewing patterns.”¹⁶ Indeed, NCTA observed that “even relatively small changes to a market definition can set off a chain of events leading to viewer disruption,” and that a “wholesale change in the way that markets are defined” would “have the potential to upend established cable carriage and viewing patterns.”¹⁷ DIRECTV agreed that changes in the DMA system would “risk upsetting the legitimate expectations of millions of viewers.”¹⁸ The Local Television Broadcasters argued that “changing the current DMA system would cause widespread and substantial harms” to viewers and local service.¹⁹

As several commenters explained, the current DMA system is the foundation of today’s video distribution model – carriage regulations and agreements, several copyright laws, affiliation agreements between local stations and networks, advertising contracts, as well as the established viewing patterns and expectations of viewers.²⁰ Therefore, one cannot impose changes on the system – especially wholesale changes

¹⁶ See Comments of The National Cable & Telecommunications Association (NCTA) in MB Docket No. 10-238 (Jan. 24, 2011), at 2.

¹⁷ NCTA Comments at 3, 5.

¹⁸ Comments of DIRECTV, Inc. in MB Docket No. 10-238 (Jan. 24, 2011), at 7.

¹⁹ Local Television Broadcasters Comments at 2. *Accord* NAB Initial Comments at 22-27 and BIA Initial Study at 16-26.

²⁰ See, e.g., NCTA Comments at 2-6; NAB Initial Comments at 25-27; LIN Television Comments at 6-7.

such as reformulating DMAs based on state boundaries – without seriously disrupting the distribution of television programming, including local. As LIN Television explained, “[t]he government cannot increase the amount of in-state programming available to viewers by attempting to re-structure the television business along state lines because no other aspect of the television industry is organized that way.” One particularly adverse result of such a restructuring would be the provision of “duplicative network and syndicated programming” (as well as less responsive “local” news programming “from far-away communities”), ultimately likely resulting “in a substantial net loss” of truly “local programming.”²¹ MVPD commenters similarly observed that the suggestions in the *Notice* to redefine DMAs based solely or primarily on state boundaries would likely reduce the local programming available to cable and satellite subscribers.²²

Proposed changes to the existing DMA structure are also, in many cases, simply impractical. The placement of broadcast towers and the physically-limited reach of broadcast signals prevent stations from aligning their coverage areas with political boundaries. MVPD commenters agreed that such changes are infeasible. NCTA noted that under a realigned television market system, cable operators could have issues with

²¹ LIN Television Comments at 7.

²² See NCTA Comments at 5-6 (explaining that basing DMAs on state boundaries might cause cable customers to “lose access to other, out-of-state broadcast stations more local to the community – stations that might carry news, sports, and other programming more of interest to those viewers than programming carried on in-state stations more distant from that community”); DIRECTV Comments at 8 (replacing current DMA system would cause “[m]any more subscribers” to “face a dearth of adequate local programming,” and imagining “the reaction of Arlington, Virginia, residents to the news that Richmond stations are now ‘local’ to them but Washington, D.C., stations are not”).

receiving a “good quality signal” from a broadcaster to the cable headend.²³ DIRECTV reported that its satellite system “is simply not equipped to accommodate such changes.” DIRECTV’s spot beam satellites are carefully calibrated to match the location of markets under the current DMA system and those spot beams “cannot be changed.” If DMAs were replaced with another definition of “local market,” DIRECTV stated that its “existing system could neither deliver ‘local’ stations to their new ‘local’ subscribers nor comply with statutory local broadcast requirements and contractual obligations.”²⁴

Both broadcast and MVPD commenters in this proceeding thus have explained that changing the system of local television markets would be highly disruptive to television distributors and viewers, and ultimately harmful to the goal of providing local stations and programming to consumers. The Commission’s report to Congress should reflect this rejection of calls for major changes to the DMA system.

IV. Pay TV Distributors May Provide Out-Of-Market Programming, Including Local News And Sports, Without Changes To Existing Law

In evaluating the totality of in-state and other locally relevant programming available to consumers, the Commission must also recognize that MVPDs are permitted to, and in fact do, deliver the local news, sports, weather and public safety programming of local stations to serve in-state viewers in non-local DMAs.²⁵ NCTA acknowledged this opportunity by noting that cable operators have the right “to carry any broadcast signal, local or distant, in-state or out-of-state, provided they comply with certain carriage-

²³ NCTA Comments at 5.

²⁴ DIRECTV Comments at 8.

²⁵ See NAB Initial Comments at 30-34; Local Television Broadcasters Comments at 11-12.

related rules, including retransmission consent and the network non-duplication, syndicated exclusivity and sports blackout rules.”²⁶ Although NCTA comments that this right exists “in theory,” NAB and other commenters have shown that agreements to carry the non-duplicative local programming of out-of-market (but in-state) stations exist in fact in a number of markets across the country.²⁷ DMA boundaries are no obstacle to delivering locally-produced programming into in-state, out-of-market areas.

Accordingly, the Commission should reject any calls in this proceeding by MVPDs to allow them to import duplicative national network or syndicated programming from out-of-market stations. There is no public interest in allowing such importation of duplicative, distant programming, which would be devastating to local broadcasters and their ability to attract advertising revenue vital to supporting high quality programming, including local news and information. As explained by the Local Television Broadcasters, the “[i]mportation of duplicative national programming would fragment the station’s local, in-market audience for such programming, thereby diminishing advertising revenues that support the production of local programming, and would permit cable and satellite carriers to drop the local affiliate’s signal, harming the local station and ultimately harming viewers.”²⁸ Viewers clearly would not benefit from regulatory changes that would ultimately diminish the overall production of local television programming.

²⁶ NCTA Comments at 6.

²⁷ See NAB Initial Comments at 33-34; Local Television Broadcasters Comments at 11-12.

²⁸ Local Television Broadcasters Comments at 2; *accord* NAB Initial Comments at 28-29.

V. The Commission Should Reject DISH’s Proposals To Create “Presumptions” And “Waivers” To Expand Satellite Transmissions Of Distant Signals

DISH submitted two proposed modifications to the Commission’s rules by which it seeks to expand its ability to import distant in-state signals into local markets whose DMAs straddles two states. Specifically, DISH proposed either that the Commission “create a presumption that in-state local broadcast stations are significantly viewed in orphan counties, or utilize waivers to designate as significantly viewed in-state local broadcast stations in orphan counties on the basis of all television households, not just those households receiving the relevant signal over-the-air.”²⁹ DISH’s proposals should be rejected for a number of reasons, including: 1) satellite carriers would be prohibited from using the local satellite compulsory license to retransmit the signals of stations deemed significantly viewed (SV) under DISH’s proposed changes; 2) these proposals would be contrary to the entire rationale of SV, that such signals can and are significantly viewed by viewers over the air; 3) the proposals would subvert clear Congressional intent that Congress, not the Commission, should determine what, if any, substantive modifications should be made to existing television markets; and 4) they could greatly harm, economically and unnecessarily, local stations with no meaningful offsetting consumer benefits. And as shown in NAB’s initial comments and in these

²⁹ Comments of Dish Network L.L.C. in MB Docket No. 10-238 (Jan. 24, 2011), at 7. DISH referred to “orphan counties” as encompassing “all consumers who cannot receive a substantially complete package of programming from stations licensed within their home state,” particularly “a full array of stations affiliated with each of the Big 4 networks from in-state broadcast licensees.” *Id.* at 2. Thus, according to DISH, the residents of Arlington and Bethesda reside in orphan counties because they receive service from “Big 4” network affiliated stations licensed to Washington, DC.

replies, radical changes to the structure of local television markets are not needed to ensure that viewers have access to in-state broadcast stations and programming.

A. Stations Deemed SV Pursuant to DISH's Proposed Changes Would Not Be Eligible for Carriage under the Compulsory License

DISH acknowledged that the "Copyright Act directs the Commission to designate stations as significantly viewed using the rules, regulations, and authorizations of the [Commission] in effect on April 15, 1976, applicable to determining with respect to a cable system whether signals are significantly viewed in a community."³⁰ Under these rules, DISH would be prohibited by the Copyright Act from using the local satellite compulsory license to carry the stations it is now proposing to retransmit (*i.e.*, those stations DISH wants to deem significantly viewed, contrary to the Commission's SV status qualifications in effect in 1976).

Notwithstanding what it mischaracterizes as a mere "constraint" on its proposals, DISH suggested that shifting the evidentiary burden so that in-state stations that are not, in fact, SV in so-called orphan counties would suddenly be presumed, in fact, to be SV is somehow permissible because such burden shifting would not be "substantive," but rather would be a "procedural . . . evidentiary question[]."³¹ As support, DISH cited a 1977 amendment to the SV rules which permitted cable systems to survey more than one community in a single survey, so long as the survey included proportional representation of households from the included communities, and FCC amendments to its rules to accommodate digital broadcasts.³²

³⁰ DISH Comments at 7-8, citing 17 U.S.C. § 122(a)(2).

³¹ DISH Comments at 8.

³² DISH Comments at 8.

While DISH failed to state with any specificity how its “burden shifting” proposal would work, presumably what could be hundreds of in-state stations that are not, in fact, SV in orphan counties would suddenly be presumed, in fact, to be SV in those counties. While DISH also failed to state how this new presumption would be overcome, one could easily foresee DISH simply filing hundreds of petitions asserting SV status for these in-state stations, then requiring the out-of-state affected stations to expend significant financial and other resources on surveys demonstrating the in-state stations were not SV (and also increasing the administrative burden on the Commission to process all of these petitions). As noted above, stations need such scarce resources to provide quality programming and services, including local.

Clearly, DISH’s proposed change would be “substantive” – and one contrary to the requirement that the Commission determine SV status using rules in effect in 1976. Such a change would be nothing like the Commission’s 1977 rule change permitting cable systems to combine more than one community in an SV survey. There is no basis for DISH’s “theory” that this 1977 rule could have made it easier to show a station was SV because it would enable one community to “piggyback” on higher proportional viewing in a neighboring community.³³ To the contrary, the Commission found at that time that “there is no inherent bias in this change, either for the introduction of more signals or for a reduction in the number of signals likely to achieve significant viewing status.”³⁴ Moreover, the Commission has deemed “substantive,” and refused to adopt, proposed changes to the SV rules “that would presume . . . stations are significantly

³³ DISH Comments at 8.

³⁴ *Definition of Cable Television System and Creation of Classes of Cable Systems*, Report and Order, 42 Fed. Reg. 19329, 19334, ¶ 31 (1977).

viewed” because “SHVERA did not authorize any [such] approach.”³⁵ In sum, there is simply no basis for the Commission to adopt a proposal to make substantive rule changes contrary to statute as to the SV status of broadcast stations.

B. DISH’s Proposal to Include Viewing from All Sources in SV Determinations Would Be Contrary to the Entire Rationale for SV Rules

The SV rules for cable are based on the premise that it makes no sense to deny a cable subscriber access to an out-of-market station that his non-cable subscriber neighbors could and did view over the air. The laws of physics preclude in-market stations from any expectation of program exclusivity as against stations that could and were being viewed over the air. As the Commission explained: “Cable development is not likely to be advanced if television choices on the cable are more limited than choices over the air, nor is it reasonable that signals significantly viewed over the air be excluded from carriage on cable systems.”³⁶ More recently, the Commission confirmed that the “true meaning” and “true intent” of the SV rules was that they apply “only [to] households that receive broadcast signals via an over-the-air antenna.”³⁷

DISH’s proposal “to utilize waivers to designate as significantly viewed in-state local broadcast stations in orphan counties on the basis of all television households, not

³⁵ *Implementation of the Satellite Home Viewer Extension and Reauthorization Act of 2004*, Report and Order, 20 FCC Rcd 17278, 17291 ¶ 29 (2005) (“2005 SHVERA Order”). Furthermore, placing such a burden of proof on parties by requiring them to disprove SV would be contrary to well established rules of evidence that such a burden should be upon the moving party, which possesses the facts necessary to meet the burden.

³⁶ Cable Television Report and Order, 36 FCC 2d 143, 174 ¶ 83 (1972) (emphasis supplied).

³⁷ 2005 SHVERA Order, 20 FCC Rcd at 17292, ¶ 32.

just those households receiving the relevant signal over-the-air,”³⁸ would be contrary to the entire rationale of the SV rules and would constitute a major substantive change to the 1976 rules. Indeed, the Commission has determined precisely that:

It would also be inconsistent with the original intent of the SV process to permit satellite carriers to use their own subscribers in audience surveys to demonstrate SV status.³⁹

C. Adoption of DISH’s Proposals Would Controvert Congress’s Intent that It, Not the Commission, Make Any Substantive Changes to Existing Market Modification Procedures

DISH’s proposals are an obvious attempt to obtain from the Commission through the SV back door, “market modification” provisions which Congress has considered and rejected. Several individual Members of the Senate and House sought to amend STELA to alter television market structures including with respect to so-called “orphan counties.”⁴⁰ *None* of these amendments was adopted by Congress. Instead, STELA included a provision requiring the Commission to prepare the *report* that is the subject of this proceeding. The consideration, but ultimate rejection, of market modification proposals by Congress demonstrates that Congress did not intend for STELA to effectuate DISH’s SV proposals. Moreover, the directive to the Commission to examine

³⁸ DISH Comments at 7 (emphasis added).

³⁹ 2005 SHVERA Order, 20 FCC Rcd at 17293 ¶ 32. Indeed, it has been Commission policy to “err on the side of excluding stations that are not actually significantly viewed.” *Id.* at ¶ 27. DISH’s proposal would do just the opposite.

⁴⁰ See, e.g., Markup on “H.R. 2994, a Bill to Reauthorize the Satellite Home Viewer Extension and Reauthorization Act of 2004,” Before the House Subcommittee on Communications, Technology, and the Internet, Committee on Energy and Commerce, 111th Cong. (June 25, 2009) (transcript), at 29 1. 520 – 33 1. 624 (colloquy between Rep. Deal and Rep. Boucher discussing “orphan county” issue); Draft amendment to S. 2764 intended to be proposed by Sen. McCaskill (designated GRA09973); Committee amendment [staff working draft] to S. 2764 intended to be proposed by Sen. Udall (N.M.) (Nov. 17, 2009).

access to in-state broadcast signals and programming and to report to Congress is a clear indication by Congress that it does not intend for the Commission to address this issue in a rulemaking before Congress has an opportunity to consider the Commission's report.⁴¹

D. DISH's Proposals Could Greatly and Unnecessarily Harm Viewers and Local Stations

As explained above, television markets are based on actual viewing patterns, which have evolved over many years, and they are intricately linked to copyright law.⁴² Those markets, in turn, are the basis for the complex and intrinsically interrelated contracts, network affiliation agreements, syndicated programming agreements, sports programming agreements, and music licensing agreements—all negotiated in the free market—that govern broadcast television programming production and distribution. Artificial manipulation of television markets therefore will have significant adverse ramifications—not all foreseeable—in the free market that drives the television industry and that makes it possible for viewers, virtually everywhere, to receive the widest diversity of national and local broadcast television programming.

By proposing to greatly increase the number of television stations regarded as significantly viewed, DISH seeks to greatly increase the importation of out-of-market

⁴¹ See, e.g., *MPAA v. FCC*, 309 F.3d 796, 807 (2002) (court found that FCC lacked statutory authority to promulgate regulations mandating video description because “Congress authorized and ordered the Commission to *produce a report* [on video description] – nothing more, nothing less”) (emphasis in original); *American Bankers Ass’n v. SEC*, 804 F.2d 739, 750 (D.C. Cir. 1986) (holding that SEC had no authority to regulate banks as broker-dealers in part because “rather than authorize appropriate rulemaking if, in its expertise, the SEC concluded that banks should be subject to broker-dealer regulation, Congress directed the agency to report back to Congress ‘with *recommendations for legislation* as it deems advisable”) (emphasis in original) (quoting 15 U.S.C. § 78k-l(e)).

⁴² See pages 6, 8-9, *supra*.

stations' signals containing duplicative national and syndicated programming, including entertainment and sports. As discussed in Section IV and in NAB's initial comments (at 26-29), no public interest purpose is served by allowing *duplicating* programming from an out-of-market station that lacks actual over-the-air viewership to be imported into a local market when that same programming can already be seen on a truly local station.

Moreover, DISH's in-state SV proposals are not necessary to allow the importation by satellite of local news, weather, public affairs, and sports programming from out-of-market stations in any particular state. As explained in Section IV and in NAB's initial comments (at 30-34), DISH and other satellite and cable operators may import that kind of locally-produced and locally-owned programming from a distant in-state station by simply asking the distant station for consent to do so.⁴³ If DISH believes that some viewers residing in the so-called orphan counties desire such additional in-state programming, DISH has the ability today to provide this programming.⁴⁴

Other MVPDs' expressed concerns about "orphan" counties are similarly unavailing. Cablevision states that its subscribers in Durango, CO, on a system recently acquired in a transaction with Bresnan Communications, "receive the signals of New Mexico broadcasters rather than the Colorado broadcasters that air the politics, news

⁴³ Any such requests would be entirely consistent with long-standing FCC rules pertaining to network non-duplication and syndicated exclusivity.

⁴⁴ NAB also notes that, to the extent that DIRECTV expressed concerns about orphan counties, DIRECTV is similarly able to import in-state local programming for delivery to viewers in such counties. See DIRECTV Comments at 7 (urging approaches that "could allow DIRECTV to import in-state local programming to orphan counties," but correctly noting many problems with replacing "DMAs with some entirely different system").

and sports of interest to Durango citizens.”⁴⁵ Commenters have already pointed out that cable systems in the southern Colorado counties of Montezuma and La Plata (which include the city of Durango) import local in-state news from Denver television stations.⁴⁶ Moreover, an examination of Bresnan Communications’ current channel line-up and the television listings for Durango shows that viewers in Durango have access to multiple Denver stations, including their local news programming.⁴⁷ Clearly, Cablevision’s concerns about orphan counties can and are being addressed (and in a manner much less disruptive than altering the basic structure of television markets nationwide).

For all these reasons, the Commission should reject DISH’s and others’ invitation to depart from the process Congress authorized in STELA, namely to provide it with the report that is the subject of this proceeding, and to let Congress make the determination if, and how, the current market modification and SV rules should be changed.

VI. Conclusion

As we have shown in these and our initial comments, and as other commenters have confirmed, the current DMA system ensures that viewers across the country receive very high levels of in-state television service and locally responsive programming. Given the plethora of in-state and out-of-state television signals provided to viewers both over-the-air and via MVPDs, there is no justification to seriously disrupt existing local television markets by altering the current DMA system. Nor is there any

⁴⁵ Comments of Cablevision Systems Corp. in MB Docket No. 10-238 (Jan. 24, 2011), at 1. La Plata and Montezuma counties in southern Colorado are in the Albuquerque, NM DMA.

⁴⁶ NAB Initial Comments at 33-34; Local Television Broadcasters Comments at 11-12.

⁴⁷ See Attachment B, Yahoo! TV Listings for Durango and Bresnan Communications Channel Line-up in Durango.

justification to alter existing rules to permit cable and satellite operators to expand their importation of distant signals and duplicative broadcast programming, thereby undermining the economic support for local television stations' provision of valued services to local communities and viewers.

**FURTHER ANALYSIS OF IN-STATE AND OUT-OF-STATE REACH
BY LOCAL TELEVISION STATIONS**

Introduction

In an analysis recently submitted to the Federal Communications,¹ we analyzed the extent to which consumers receive local broadcast signals and programming via over-the-air transmission and through cable and satellite delivery. Among other data, that paper provided estimates of the in-state and out-of-state audience reached by full-power broadcast television stations throughout the U.S., and demonstrated the very high levels of in-state television service being provided to the American public.

This report adds to our previous analysis by examining the delivery of Class A, low-power television, and translator stations via over-the-air transmission, and shows the added reach that these additional facilities provide. While nearly 98% of the American public can receive at least one in-state full-power television station via over-the-air transmission, that number increases to 99.12% when factoring in the over 6,000 television translator stations. On a weighted average basis, consumers across all counties can receive over the air 13.2 in-state full-power television stations or translators of these stations.

In addition, there are over 3,700 Class A and low-power television stations providing service to local audiences. When including those television facilities along with full-power and

¹ See Mark R. Fratrick, *Analysis of In-State and Out-of-State Reach by Local Television Stations*, submitted as Attachment A, NAB Comments, In the Matter of The Media Bureau Seeks Comments for Report Required by the Satellite Extension and Localism Act on In-State Broadcast Programming, MB Docket No. 10-238, January 24, 2011

translator television stations, consumers across all counties receive, on a weighted average basis, 17.6 in-state stations over the air. By including translator, Class A and low-power television stations, the percentage of Americans being served over the air is nearly universal, and the number of these in-state television stations is significantly larger than was demonstrated in the earlier analysis of full-power stations alone.

Delivery of Local Television Stations via Over-the-Air Transmission

Description of Methodology Used in Analysis

As was done in the previous analysis of full-power television stations, to quantify the added reach of translator television stations, we applied the Longley-Rice methodology for estimating stations' coverage patterns.² DataWorld, a subsidiary of BIA/Kelsey, maintains a current database of all broadcast technical facilities that allows us to estimate these coverage patterns. Moreover, we compared the coverage patterns of translator stations with the coverage patterns of the stations originating the signals to eliminate any overlap areas in our calculations.

For the analysis of Class A and low power television stations, we added the coverage patterns of those additional television stations to the coverage patterns of the full-power and non-overlapping translator television stations to generate a complete set of coverage patterns for all television stations serving the U.S.

² The FCC suggests using the Longley-Rice methodology, as described in OET Bulletin No. 69, *Longley-Rice Methodology for Evaluating TV Coverage and Interference*, July 2, 1997, Federal Communications Commission. See FCC Public Notice, "Media Bureau Seeks Comment for Report Required by the Satellite Television Extension and Localism Act on In-State Broadcast Programming," MB Docket No. 10-238 (Nov. 23, 2010), p. 2.

We compared all of these television stations' coverage patterns with the 2000 U.S. Bureau of the Census population information on a census block basis. Census blocks are the smallest areas for which population data are provided. For each census block, we determined whether broadcast television stations' signals reached the centroid (i.e., middle) of that census block. If a station's signal reached that centroid, then we counted that station as serving the population within that census block. Since the identity of each station is known, we knew whether that television station was reaching a census block within the state in which it was licensed, or whether it was an out-of-state television station. We could then calculate the total number of in-state and out-of-state television stations reaching each of the 5.6 million census blocks and the population served by those stations. The census block information on the populations served by varying numbers of in-state and out-of-state television stations can then be aggregated to the county level, thereby generating estimates of the population within each county being served by different numbers of in-state and out-of state television signals.

Full-Power Television Stations with Translators

County Level Results – Full-Power Television and Translator Stations

There are 3,141 counties in the U.S., almost all of which are included in the 210 television markets as delineated by Nielsen Media Research.³ While in-state full-power television stations reach at least one census block in 3,067 of these counties, that number increases to 3,136 counties that have at least some of their population being served over the air

³ There are 13 very remote counties in Alaska that are not included in any of the 210 television markets.

by at least one in-state full power television station or a translator. In total, there are only 13,396 people in the five counties that do not receive in-state full-power television station or translator service over the air to any part of the county.

Within the 3,136 counties being served over the air by some in-state television stations, the vast majority of the population can receive at least one in-state full-power or translator television station. Overall, 278.939 million people in these counties are able to receive at least one in-state television station over the air, while only 2.469 million in those counties cannot (and many of these viewers have access to in-state stations and programming by cable or satellite). Combined with the 13,396 people in counties with no in-state television reach, the total number of people unable to receive in-state full-power or translator television signals over the air is approximately 2.483 million, or just 0.88% of the total population in all 3,141 counties. In other words, 99.12% of the total population can receive at least one in-state full-power television station or translator of those stations via over-the-air transmission.

In terms of the number of in-state television signals received, the results are equally impressive. Across all 3,141 counties, the weighted average (by the relative population in each county) of in-state full-power television stations or translators received over the air is 13.2 stations. Within these 3,141 counties, consumers also receive a weighted average (by the relative population in each county) of 3.9 out-of-state full-power television stations or translators. Appendix 1 lists all 3,141 counties with the percentage of each county's population receiving over the air at least one in-state full-power television station or translator, and the weighted averages of the number of in-state and out-of-state full-power and translator television stations received in each county.

Television Market Results – Full-Power Television and Translator Stations

Examining these results on a television market basis requires aggregating the county level data by the markets to which they are assigned.⁴ In the average television market, 98.5% of the market population can receive over the air at least one in-state full-power television or translator signal. There are 79 television markets where 100% of the market population can receive at least one in-state full-power television or translator station over the air. Moreover, there are 87 markets where the weighted average of the number of in-state full-power television and translator stations received over the air exceeds 10 stations (with 176 markets receiving more than five in-state stations and 206 markets receiving more than three in-state stations.) Appendix 2 includes a full list of all 210 television markets and the populations within these television markets receiving over the air at least one in-state full-power television or translator station. This appendix also identifies the weighted average number of in-state and out-of-state full-power television stations and translators received over the air in each television market.

Full-Power Television Stations with Translators, Class A and Low Power Television Stations

County Level Results – Full-Power Television Stations with Translators, Class A and Low Power

In 3,137 of the 3,141 U.S. counties some populations are being served by at least one in-state full-power television station, translator, Class A or low-power television station. In total,

⁴ In a small number of markets, counties are split across two markets. Nielsen Media Research does not make publicly available which census blocks in these split counties are assigned to which of the different markets. Accordingly, we assigned each of these split counties to the market in which the majority of the population is located.

there are only 11,189 people in the four counties that do not receive any in-state television station service of any type over the air to any part of the county.

Within the 3,137 counties being served by some in-state television stations, the vast majority of the population can receive at least one in-state television station. Overall, 279.278 million people in these counties are able to receive at least one in-state television station over the air, while only 2.133 million in those counties cannot (and, again, many of these viewers have access to in-state stations and programming via cable or satellite). Combined with the 11,189 people in the four counties with no over the air in-state television reach, the total number of people unable to receive in-state television signals over the air is approximately 2.144 million, or just 0.76% of the total population in all 3,141 counties. In other words, 99.24% of the total population can receive at least one in-state television station (full power, translator, Class A and/or low power) via over-the-air transmission.

In terms of the number of in-state television signals received over the air, the results demonstrate extremely high levels of in-state broadcast television service. Across all 3,141 counties, the weighted average (by the relative population in each county) of in-state television stations of all types received by consumers is 17.6 stations. Within these 3,141 counties, consumers also receive a weighted average (by the relative population in each county) of 4.5 out-of-state television stations. Appendix 3 lists all 3,141 counties with the percentage of each county's population receiving over the air at least one in-state television station of any type, and the weighted averages of the number of in-state and out-of-state television stations of any type received over the air in each county.

Television Market Results – Full-Power Television Stations with Translators, Class A and Low Power

In the average television market, 98.6% of the market population can receive over the air at least one in-state full-power, translator, Class A or low-power television signal. There are 79 television markets where 100% of the market population can receive at least one in-state television station of any type over the air. Moreover, there are 123 markets where the weighted average of the number of in-state full-power, translator, Class A and low-power stations received over the air exceeds 10 stations (with 194 markets receiving more than five in-state stations and 207 markets receiving more than three in-state stations). Appendix 4 includes a full list of all 210 television markets and the populations within these television markets receiving over the air at least one in-state television station of any type. This appendix also identifies the weighted average number of in-state and out-of-state television stations of any type received over the air in each television market.

Conclusion

Our earlier analysis demonstrated that an overwhelming percentage of the U.S. population is being served by many in-state full-power television stations via over-the-air transmissions, as well as through cable and satellite delivery. This report shows that the reach of over-the-air in-state service is even greater, and the numbers of in-state television stations serving the U.S. population are even larger, when translators, Class A and low-power television stations are included in the analysis. Taken together, these two reports demonstrate that the

current system of defining local television markets does not need to be altered in order to ensure that the viewing public has access to in-state broadcast television stations and programming.
