2027
NAB ENGINEERING ACHIEVEMENT AWARDS
PROFESSIONAL REQUIREMENTS AND NOMINATION FORM

NAB is currently accepting nominations for the **2027 NAB Engineering Achievement Awards.** Each year since 1959, NAB has presented the Engineering Achievement Award to individuals for their outstanding accomplishments in the broadcast industry. In 1991, NAB began giving two awards each year—one for achievements in radio and the other for television.

Honorees will be recognized at NAB Show 2027 in Las Vegas, April 4-7, 2027.

Candidates for the Radio and Television Engineering Achievement Awards must be or have been an owner, officer or employee of any company, subsidiary or division whose primary business is broadcasting or is directly in support of broadcasting, including employees of the federal government directly engaged in broadcast engineering work. The size of the organization with which each candidate is affiliated is not a determining factor. The merits of the contributions to broadcast engineering are the sole factors to be considered.

The candidates for the two Engineering Achievement Awards shall be recognized either based on a single significant contribution or for contributions made over a period of time that have significantly advanced the state of the art of broadcast engineering. Candidates for the awards shall have made contributions in the following categories:

- *Inventions*
- *Development of new techniques*
- *Dissemination of technical knowledge and literature*
- *Leadership in broadcast engineering affairs*
- *An outstanding contribution which, in the opinion of the NAB Executive Committee, warrants consideration*

The period of time encompassed by the engineering contributions of the candidates for the awards should be relatively recent and need not cover the nominee's entire career. The award winners will be selected by the NAB Industry Affairs and Innovation (IAI) department and NAB Executive Committee.

2027 NAB ENGINEERING ACHIEVEMENT AWARDS NOMINATION FORM

The purpose of this form is to collect information about candidates for the 2027 NAB Engineering Achievement Awards. Please complete this form with timely and relevant information. Attach additional exhibits if desired.

Please send nominations to TechAwards@nab.org by *close of business, Tuesday, January 19*, 2027.

Please indicate for which Engineering Achievement Award you are nominating this individual:
