# 2027
# NAB TECHNOLOGY INNOVATION AWARD
## ELIGIBILITY REQUIREMENTS AND NOMINATION FORM

NAB is currently accepting nominations for the **2027 NAB Technology Innovation Award**. First presented at the 2009 NAB Show, NAB presents the award to organizations that demonstrate advanced research and development projects of significant merit at NAB Show. **Nominations are limited to projects that *have not* been commercialized into products.**

The honoree will be recognized at NAB Show 2027 in Las Vegas, April 4-7, 2027.

Candidates for the Technology Innovation Award must be presented by organizations that are exhibiting at NAB Show 2027. The size of the organization is not a determining factor.

Nominated research and development projects may *not* be commercial products but must be demonstrated or exhibited in some form at NAB Show 2027. The merits of the technology and its relevance to the broadcast, media and entertainment community are the sole factors that will be considered in selecting the award winner.

Please use this form to submit information about the nominated research and development technology, how it will be demonstrated or presented at NAB Show 2027 and why it should be considered for the NAB Technology Innovation Award. If multiple organizations are involved in the project, please list them all but indicate a single point of contact for the nominated technology.

Please complete this form with timely and relevant details. Additional exhibits may be attached.

## 2027 NAB TECHNOLOGY INNOVATION AWARD NOMINATION FORM

The purpose of this form is to collect information about candidates for the 2027 NAB Technology Innovation Award. Please complete this form with timely and relevant information. Attach additional exhibits if desired.

**Please send nominations to TechAwards@nab.org by *the end of the day, Monday, March 1, 2027***

Technology Name _____

_____

Presenting Organization(s) _____

_____

**Description of technology to be exhibited:** (Please explain the research and development project, how it is being demonstrated at NAB Show 2027 and why it is unique or how it advances the current state of technology for the media and entertainment industry. Attach additional exhibits if necessary, and reference them in the description below.)

☐ **By checking this box, I confirm that, to the best of my knowledge, commercial products using this technology will *not* be available at the time of NAB Show 2027.**
